Domain I: People	4
Domain II: Process	7
Domain III: Business Environment	10

Introduction

The Project Management Institute (PMI) offers a professional certification for project managers, known as the Project Management Professional (PMP)[®]. PMI's professional certification examination development processes stand apart from other project management certification examination development practices. PMI aligns its process with certification industry best practices, such as those found in the *Standards for Educational and Psychological Testing*. The PMP[®] certification is also accredited against the internationally recognized ISO 17024 standard.¹

A key component of this process is that organizations wishing to offer valid and reliable professional credentialing examinations are directed to use a Role Delineation Study (RDS) or Job Task Analysis (JTA) as the basis for the creation of the examination. This process utilizes knowledge and task-driven guidelines to assess the practitioner's competence, and determine the levels of salience, criticality, and frequency of each of the knowledge, tasks and skills required to perform to the industry-wide standard in the role of a project manager.

In this year's update to the PMP, PMI conducted a Global Practice Analysis market research study, which produced a number of trends in the profession previously unaddressed in the PMP exam. These trends were used as inputs into the Job Task Analysis and ensure the validity and relevance of the PMP examination. Validation assures the outcome of the exam is, in fact, measuring and evaluating appropriately the specific knowledge and skills required to function as a project management practitioner. Thus, the Job Task Analysis guarantees that each examination validly measures all elements of the project management profession in terms of real settings.

PMP certification holders can be confident that their professional certification has been developed according to the best practices of test development and based upon input from the practitioners who establish those standards.

The PMP examination is a vital part of the activities leading to earning a professional certification, thus it is imperative that the PMP examination reflect accurately the practices of the project management practitioner. All the questions on the examination have been written and extensively reviewed by qualified PMP certification holders and tracked to at least two academic references. These questions are mapped against the *PMP Examination Content Outline* to ensure that an appropriate number of questions are in place for a valid examination.

PMI retained Alpine Testing Solutions to develop the global *PMP Examination Content Outline*. Alpine Testing Solutions provides psychometric, test development, and credential management solutions to credentialing and educational programs.

Finally, there are noticeable differences between this updated *PMP Examination Content Outline* and *A Guide to the Project Management Body of Knowledge (PMBOK® Guide)* – Sixth Edition. While there are some commonalities, it is important to note that the volunteer taskforce involved in the study described previously were not bound by the *PMBOK® Guide*. The taskforce members were charged with outlining critical job tasks of individuals who lead and direct projects based on their experience and pertinent resources.

¹ Published jointly by the American Education Research Association, National Council on Measurement in Education, and American Psychological Association. The PMP certification is also accredited by the American National Standards Institute (ANSI) against the internationally recognized ISO/IEC 17024 standard: *Conformity Assessment—General Requirements for Bodies Operating Certification of Persons.*

EXAM CONTENT OUTLINE

The following table identifies the proportion of questions from each domain that will appear on the examination.

	Domain	Percentage of Items on Test
I.	People	42%
II.	Process	50%
III.	Business Environment	8%
	Total	100%

Important note: The research conducted through the Job Task Analysis validated that today's project management practitioners work in a variety of project environments and utilize different project approaches. Accordingly, the PMP certification will be reflective of this and will incorporate approaches across the value delivery spectrum. **About half of the examination will represent predictive project management approaches and the other half will represent agile or hybrid approaches**. Predictive, agile, and hybrid approaches will be found throughout the three domain areas listed above and are not isolated to any particular domain or task.

DOMAINS, TASKS, AND ENABLERS

In this document you will find an updated structure for the *PMP Examination Content Outline*. Based on feedback from customers and stakeholders, we have worked on simplifying the format so that the *PMP Examination Content Outline* is easier to understand and interpret.

On the following pages you will find the domains, tasks, and enablers as defined by the Role Delineation Study.

- **Domain**: Defined as the high-level knowledge area that is essential to the practice of project management.
- Tasks: The underlying responsibilities of the project manager within each domain area.
- **Enablers**: Illustrative examples of the work associated with the task. Please note that enablers are not meant to be an exhaustive list but rather offer a few examples to help demonstrate what the task encompasses.

Following is an example of the new task structure:

Task statement → Manage conflict

Enablers

- Interpret the source and stage of the conflict
- Analyze the context for the conflict
- Evaluate/recommend/reconcile the appropriate conflict resolution solution

Domain I	People—42%
Task 1	Manage conflict Interpret the source and stage of the conflict Analyze the context for the conflict Evaluate/recommend/reconcile the appropriate conflict resolution
Task 2	 Lead a team Set a clear vision and mission Support diversity and inclusion (e.g., behavior types, thought process) Value servant leadership (e.g., relate the tenets of servant leadership to the team) Determine an appropriate leadership style (e.g., directive, collaborative) Inspire, motivate, and influence team members/stakeholders (e.g., team contract, social contract, reward system) Analyze team members and stakeholders' influence Distinguish various options to lead various team members and stakeholders
Task 3	 Support team performance Appraise team member performance against key performance indicators Support and recognize team member growth and development Determine appropriate feedback approach Verify performance improvements
Task 4	 Empower team members and stakeholders Organize around team strengths Support team task accountability Evaluate demonstration of task accountability Determine and bestow level(s) of decision-making authority
Task 5	 Ensure team members/stakeholders are adequately trained Determine required competencies and elements of training Determine training options based on training needs Allocate resources for training Measure training outcomes
Task 6	 Build a team Appraise stakeholder skills Deduce project resource requirements Continuously assess and refresh team skills to meet project needs Maintain team and knowledge transfer

Task 7	 Address and remove impediments, obstacles, and blockers for the team Determine critical impediments, obstacles, and blockers for the team Prioritize critical impediments, obstacles, and blockers for the team Use network to implement solutions to remove impediments, obstacles, and blockers for the team Re-assess continually to ensure impediments, obstacles, and blockers for the team are being addressed
Task 8	 Negotiate project agreements Analyze the bounds of the negotiations for agreement Assess priorities and determine ultimate objective(s) Verify objective(s) of the project agreement is met Participate in agreement negotiations Determine a negotiation strategy
Task 9	 Collaborate with stakeholders Evaluate engagement needs for stakeholders Optimize alignment between stakeholder needs, expectations, and project objectives Build trust and influence stakeholders to accomplish project objectives
Task 10	Build shared understanding Break down situation to identify the root cause of a misunderstanding Survey all necessary parties to reach consensus Support outcome of parties' agreement Investigate potential misunderstandings
Task 11	 Engage and support virtual teams Examine virtual team member needs (e.g., environment, geography, culture, global, etc.) Investigate alternatives (e.g., communication tools, colocation) for virtual team member engagement Implement options for virtual team member engagement Continually evaluate effectiveness of virtual team member engagement
Task 12	 Define team ground rules Communicate organizational principles with team and external stakeholders Establish an environment that fosters adherence to the ground rules Manage and rectify ground rule violations

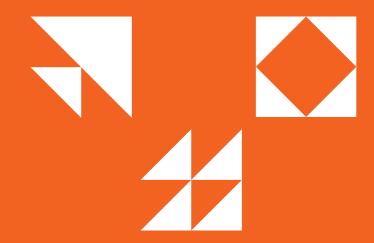

Task 13	 Mentor relevant stakeholders Allocate the time to mentoring Recognize and act on mentoring opportunities
Task 14	 Promote team performance through the application of emotional intelligence Assess behavior through the use of personality indicators Analyze personality indicators and adjust to the emotional needs of key project stakeholders

Domain II	Process—50%
Task 1	Execute project with the urgency required to deliver business value
100111	Assess opportunities to deliver value incrementally
	Examine the business value throughout the project
	 Support the team to subdivide project tasks as necessary to find the minimum viable product
Task 2	Manage communications
	Analyze communication needs of all stakeholders
	 Determine communication methods, channels, frequency, and level of detail for all stakeholders
	Communicate project information and updates effectively
	Confirm communication is understood and feedback is received
Task 3	Assess and manage risks
	Determine risk management options
	Iteratively assess and prioritize risks
Task 4	Engage stakeholders
	Analyze stakeholders (e.g., power interest grid, influence, impact)
	Categorize stakeholders
	Engage stakeholders by category
	Develop, execute, and validate a strategy for stakeholder engagement
Task 5	Plan and manage budget and resources
	Estimate budgetary needs based on the scope of the project and lessons learned
	from past projects
	 Anticipate future budget challenges Monitor budget variations and work with governance process to adjust as
	necessary
	Plan and manage resources

Task 6	Plan and manage schedule	
	Estimate project tasks (milestones, dependencies, story points)	
	Utilize benchmarks and historical data	
	Prepare schedule based on methodology	
	Measure ongoing progress based on methodology	
	Modify schedule, as needed, based on methodology	
	Coordinate with other projects and other operations	
Task 7	Plan and manage quality of products/deliverables	
	Determine quality standard required for project deliverables	
	Recommend options for improvement based on quality gaps	
	Continually survey project deliverable quality	
Task 8	Plan and manage scope	
	Determine and prioritize requirements	
	Break down scope (e.g., WBS, backlog)	
	Monitor and validate scope	
Task 9	Integrate project planning activities	
	Consolidate the project/phase plans	
	Assess consolidated project plans for dependencies, gaps, and continued business value	
	Analyze the data collected	
	Collect and analyze data to make informed project decisions	
	Determine critical information requirements	
Task 10	Manage project changes	
ruon ro	Anticipate and embrace the need for change (e.g., follow change management practices)	
	Determine strategy to handle change	
	Execute change management strategy according to the methodology	
	Determine a change response to move the project forward	
Task 11	Plan and manage procurement	
	Define resource requirements and needs	
	Communicate resource requirements	
	Manage suppliers/contracts	
	Plan and manage procurement strategy Develop a delivery activities.	
	Develop a delivery solution	

Task 12	Manage project artifacts
Task 12	Determine the requirements (what, when, where, who, etc.) for managing the project artifacts
	 Validate that the project information is kept up to date (i.e., version control) and accessible to all stakeholders
	Continually assess the effectiveness of the management of the project artifacts
Task 13	Determine appropriate project methodology/methods and practices
	Assess project needs, complexity, and magnitude
	Recommend project execution strategy (e.g., contracting, finance)
	 Recommend a project methodology/approach (i.e., predictive, agile, hybrid) Use iterative, incremental practices throughout the project life cycle (e.g., lessons learned, stakeholder engagement, risk)
Task 14	Establish project governance structure
	Determine appropriate governance for a project (e.g., replicate organizational
	governance)
	Define escalation paths and thresholds
Task 15	Manage project issues
	Recognize when a risk becomes an issue
	Attack the issue with the optimal action to achieve project success
	Collaborate with relevant stakeholders on the approach to resolve the issues
Task 16	Ensure knowledge transfer for project continuity
	Discuss project responsibilities within team
	Outline expectations for working environment
	Confirm approach for knowledge transfers
Task 17	Plan and manage project/phase closure or transitions
	Determine criteria to successfully close the project or phase
	Validate readiness for transition (e.g., to operations team or next phase)
	Conclude activities to close out project or phase (e.g., final lessons learned, retrospective, procurement, financials, resources)

Domain III	Business Environment—8%	
Task 1	Task 1 Plan and manage project compliance	
	Confirm project compliance requirements (e.g., security, health and safety,	
	regulatory compliance)	
	Classify compliance categoriesDetermine potential threats to compliance	
	 Determine potential threats to compliance Use methods to support compliance 	
	Analyze the consequences of noncompliance	
	Determine necessary approach and action to address compliance needs (e.g., risk, legal)	
	Measure the extent to which the project is in compliance	
Task 2 Evaluate and deliver project benefits and value		
	Investigate that benefits are identified	
	Document agreement on ownership for ongoing benefit realization	
	Verify measurement system is in place to track benefits	
	Evaluate delivery options to demonstrate value	
	Appraise stakeholders of value gain progress	
Task 3	Evaluate and address external business environment changes for impact on scope	
	Survey changes to external business environment (e.g., regulations, technology, geopolitical, market)	
	Assess and prioritize impact on project scope/backlog based on changes in external business environment	
	Recommend options for scope/backlog changes (e.g., schedule, cost changes)	
	Continually review external business environment for impacts on project scope/backlog	
Task 4	Support organizational change	
	Assess organizational culture	
	 Evaluate impact of organizational change to project and determine required actions 	
	Evaluate impact of the project to the organization and determine required actions	

POWERING THE PROJECT ECONOMY™
